CRUNCHY TECH

CRUNCHY TECH CUSTOM MEETING SPACES

Crunchy Tech specializes in custom meeting spaces of all types. We can do simple huddle rooms to complex townhalls. We will design and implement a system that exceeds expectations and will function for years to come.

The need to have updated and modern meeting spaces for your office is not going away. We use our years of expertise to help our clients decide what they need, and they end up with a state-of-the-art meeting space where less time is spent setting up a meeting and more time is spent collaborating within the organization.

CRUNCHY TECH

Crunchy Tech is a pioneering technology firm based in Orlando, Florida. Founded in 2008, Crunchy specializes in end-to-end commercial AV integration, meeting spaces, digital signage, interactive experiences, and world class support.

Our services include all-in-one solutions to your technology needs, including system creation, development, management, and 24/7 technical support. Our goal is to give your organization a perfectly tailored system that is customized to fit your needs.

OUR PROCESS

IF YOU CAN DREAM IT,
WE CAN BUILD IT.

WHY USE CRUNCHY TECH?

Crunchy Tech is a premier audiovisual solutions provider. We design, install, program, commission, and support top-of-the-line systems that work with the complexities of IT and networked environments.

This helps fill in the gaps for our premier IT partners who have clients seeking AV integration along with their IT service needs. With so many premier technology partners our AV systems promote ease-of-use, long-term cost effectiveness and upgradability.

Crunchy Tech also provides on-going support for our AV systems through warranty and maintenance programs to ensure the system's usability and the client's satisfaction and provides a huge added value to the end client.

HUDDLE ROOMS

Smaller conference meeting spaces can often have simple needs, or need a more robust solution. For huddle rooms we can set up the space to be video conference ready.

Whether you use Zoom, Microsoft Teams, Cisco Webex, or any other conferencing solution we will help you design a system that will meet all of your needs.

Need a camera that tracks the speaker across the room and auto-pans to the person speaking? We can also help you design a high-end system with complete automation and ease-of-use.

Be ready to jump in meetings last minute with a state-of-the-art Crunchy Tech huddle room installed in your office. Spend less time worrying about meeting space tech working and spend more time collaborating.

EXECUTIVE BOARDROOMS

Executive meetings need to go off without a hitch and can be a difference maker in landing that big deal, or next great breakthrough for the executive staff.

Multiple displays and cameras are key to these important meeting spaces. Installing a camera that tracks the speaker in the room along with a ceiling microphone array makes it so anyone in the room will have the same voice and video experience. No more huddling over conference phones that are oddly placed, and fully automate the space with easy-to-use touch panels that enable clients to, with the touch of a button, automate various needs all at once.

The only limitation for our clients next executive boardroom is their imaginations.

CRUNCHY TECH

TOWNHALLS

Townhalls and communal areas can be the centerpiece of any corporate headquarters.

These meeting spaces can be used for keynote speeches from the CEO or as a communal area for employees to unwind and catch up on some sports news. These spaces can be used for both with a proper AV system.

If the space is being used for keynote speeches from a CEO, we can install a wireless microphone system so every member of the audience can participate without having to walk a multiple microphones around.

If the space is being used as a hybrid communal area, then multiple displays and video walls can also be installed to serve as a breakroom or informative area for your valued employees.

Crunchy Tech will design, install, and support the best solution for any townhall need.

CRUNCHY TECH

CLASSROOMS

Up-to-date AV systems in classrooms help prepare students for the future. It is key that these systems are set up to cater to remote students and have all the systems in place so that students can focus on learning.

Since classrooms are becoming non-traditional spaces, AV technology is more important than ever. Think video walls, ceiling microphone arrays, and flexible seating in spaces catered to large or small group collaboration. Crunchy Tech is an expert with hybrid classrooms, and the proper tech to get it done.

CRUNCHY TECH

PRIVATE DINING ROOMS

Restaurant private dining spaces can be a real revenue generator, and with a proper distributed AV system owners can attract higher end clientele by having better AV systems in their private dining rooms.

These spaces can also be utilized for maximum efficiency, such as having single and combined rooms to utilize spaces to their full potential for any client.

Having a well-tuned and ready-to-go meeting space with bring-your-own-device connectivity, microphones, and cameras will really take restaurant private dining spaces to the next level.

CRUNCHY TECH

HOTEL BANQUET HALLS

Hotels have many areas that can generate revenue outside of actual room occupancy.

Many hotels have their own internal convention space and banquet halls. These rooms are key to bringing in larger meetings and supplementing hotel revenue, and a top-of-the-line distributed AV system is key.

Adding automation to multiple screens, projectors, and in-ceiling speakers really makes our clients happy.

The automation puts less burden on hotel staff who don't have to linger for troubleshooting due to the simplicity that automation creates for the end user.

Clients can also take automation to the next level with camera tracking and in-ceiling microphone arrays that enable users to be heard and seen anywhere in the room.

OPERATIONS CENTERS

Operations centers are vital to county government and utilities sectors. Crunchy Tech has many partners in these sectors and has been making their lives easier for years with top-of-the-line distributed AV systems.

Since most of these centers are publicly owned it is key to make sure all needs are met whether it be for broadcasting or having all the info required in front of the staff so they can do their jobs as effectively as possible.

With a high-end speaker-trak system and in-room voice lift these public centers can be used effectively and not waste the time and patience of the public and employees. More collaboration means more productivity.

CRUNCHY TECH

MICROSOFT TEAMS ROOMS

You should go with a premier partner when you wish to set up a Microsoft Teams dedicated room. Crunchy Tech has years of expertise with Microsoft Teams, and we even use it in our own office.

Coupled with Logitech soundbars, Huddly cameras, or even a Microsoft Surface Hub, we know how to make Microsoft Teams work with whatever room our clients want to dedicate to Teams conferencing.

Our clients can even take their Team's rooms to another level by implementing beam-forming microphone arrays so that every member of the conference does not have to huddle over a speakerphone, or laptop, for the meeting and be heard clearly wherever they are in the room.

CISCO WEBEX ROOMS

Crunchy Tech and Cisco work seamlessly together to create flexible and top-of-the-line meeting spaces for every team. Cisco makes it extremely easy to select the best solution for any business needs.

The Webex Room Kit is utilized by Crunchy Tech for many of our builds and provides immense flexibility for our client needs.

Top-of-the-line features such as speaker track, voice lift, and Crestron room control integration can easily be added to rooms utilizing the Cisco codec. We have over a decade installing Cisco solutions, and fully utilize what Cisco has to offer.

ZOOM ROOMS

Huddle rooms and larger conference rooms have many different video conferencing solutions now, and Zoom is a top contender. Businesses need a provider who understands Zoom solutions now more than ever.

For many Zoom rooms we typically use a Huddly or Logitech camera and a display. This makes it so all you do is plug in your laptop, launch Zoom, and then go.

No more wasting time trying to figure out what input is what and losing that valuable collaboration time. Dedicated Zoom rooms are an amazingly simple and easy solution for clients that use Zoom.

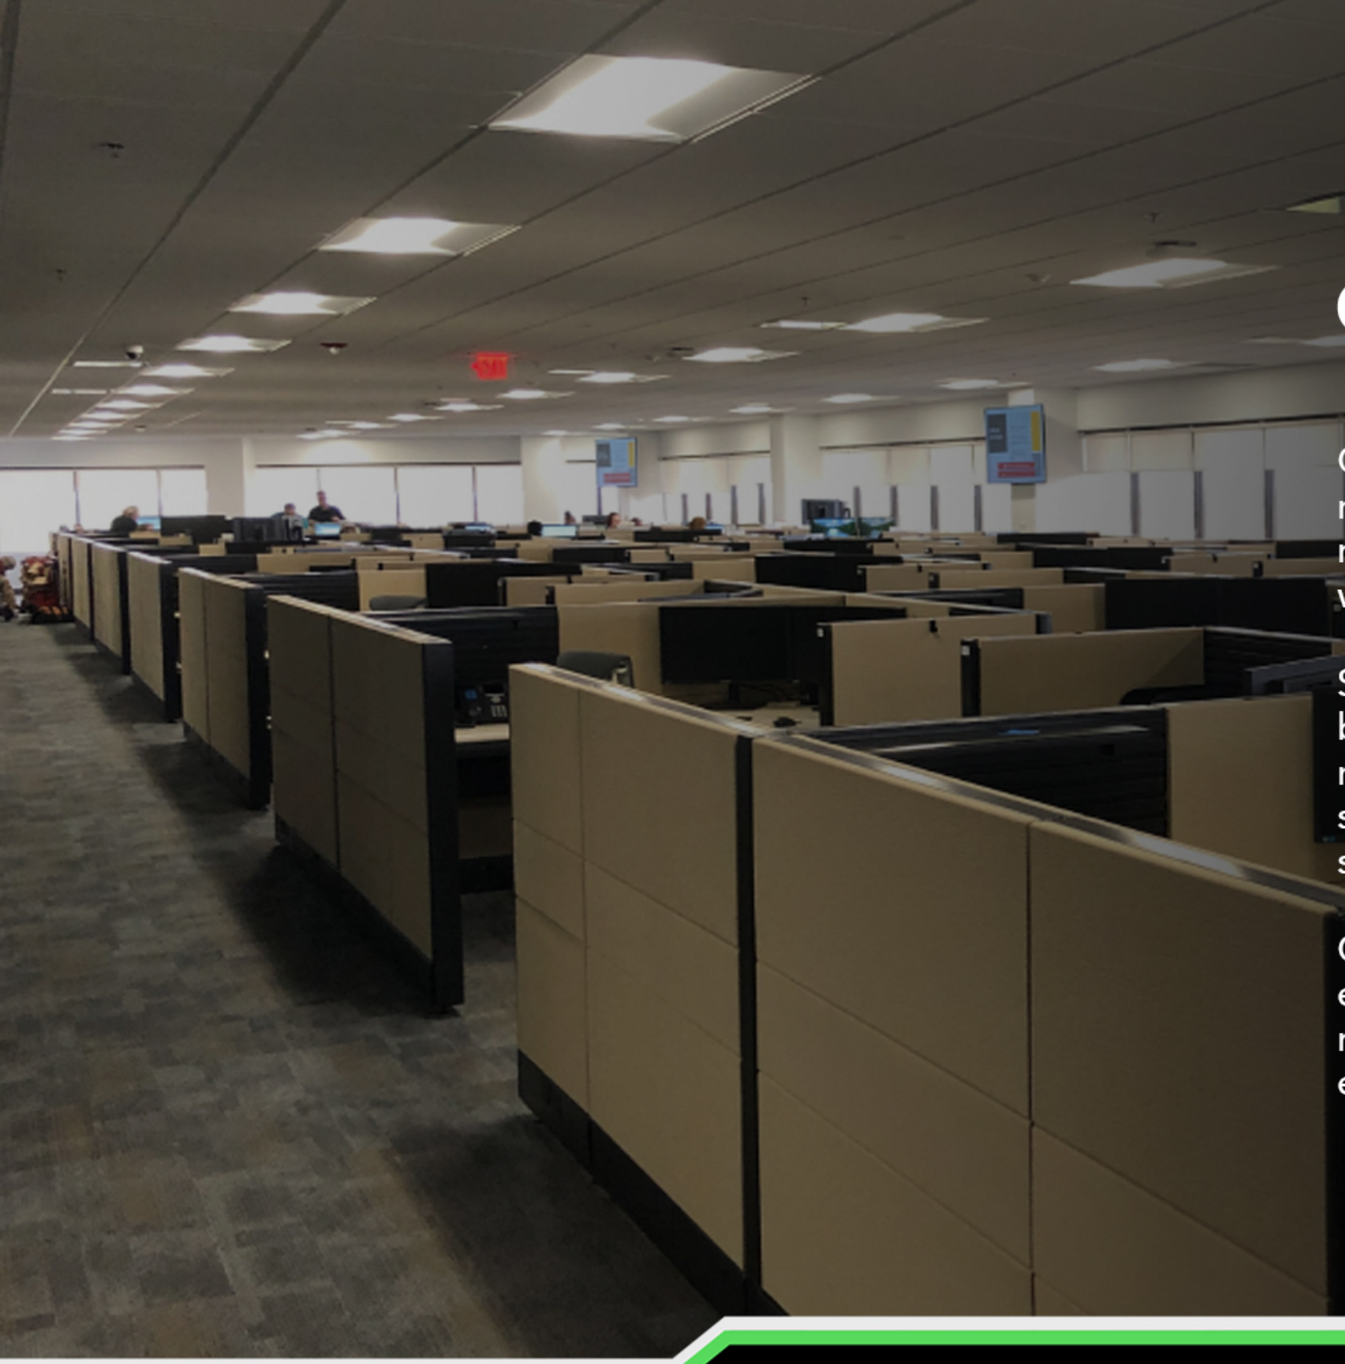
HYBRID WORKSPACE SOLUTIONS

Modern conference rooms need to be designed to cater to a wide variety of media and presenters from all over the world. The technology in these modern hybrid rooms needs to operate simply and smoothly.

Sources used in these rooms encompass a variety inputs and formats including laptops, wireless devices, and web cameras, so the AV system must be extremely flexible.

For these configurations Crunchy Tech can design a bring-your-own-device room that works with whatever meeting software you prefer.

Whether it be Teams, Zoom, or Webex we can utilize a Clickshare system, or just set up your hybrid room to be able to plug whichever laptop, camera, or any other device to get your meeting going.



CALL CENTERS

Call centers can be quite noisy and rely on productivity and the number of calls made by employees. Owners of call centers should not have to worry about ambient noise and whether all their workstations are hooked up properly or not.

Sound masking is the process of adding an unobtrusive background noise to an environment to cover up excess speech noise through emitters installed in the ceiling. At Crunchy Tech, we specialize in sound masking with high-end Cambridge sound solutions.

Clients can even utilize our “smart hands” service which encompasses desktop PC’s, monitors, phone installation and network configurations making sure all peripherals work for employees when they come into the office.
