

# RENT A PADZILLA

Padzilla is a fully functional giant iPhone. It is not an emulation, but true native iOS. Renting a Padzilla can really take your trade show booth to the next level!

Access over 1,960,000+ apps from the App Store and supersize your iOS experience with the world's largest iPhone accessory!

## Giant iPhone

Padzilla can be mounted in an office lobby, stand at a trade show with a traveling mount, or can be mounted to a wall. Padzilla looks and functions exactly like a giant iPhone! With a fully functioning swipe up for home, volume control, front facing camera, and familiar iOS operating system, anyone can use a Padzilla.

## RENT A GIANT IPHONE FOR YOUR NEXT SHOW

### SHOW OFF YOUR APP

Showcase your app with ease. Simply download your app from the app store and it will run perfectly on Padzilla. No need for extra programming for your app to work since Padzilla is truly native iOS and works just like an iPhone. Show off your company's new initiative in style!

### INTUITIVE EXPERIENCE

The same user experience you know and love from iOS is the same on Padzilla as it is on the iPhone. The same user experience that is intuitive enough that there is no learning curve is at your disposal for showing off your next corporate initiative or app to your clients and prospects.

### FUNCTIONAL CAMERA

Utilize interactive photo booth applications using apps like SnapChat or Instagram. Make your trade show booth stand out with the interactive features on Padzilla. The fully functional front camera is the same quality you expect on your iPhone or digital camera.

### INTERACTIVE DEMOS

Create vibrant and interactive demos to really make your company's message pop. Anything the iPhone can do Padzilla can do as well. Enjoy the same interactivity as an iPhone or iPad and supersize your iOS experience with amazing interactivity!

“ The 43” and 55” Giant iPhone has become a fantastic addition to our medical exam rooms and clinic spaces at the White House and President’s Hospital. Our patients and providers have been amazed at the endless uses of this product– telemedicine, patient education, emergency medical planning, etc... The quality of the anatomy images from the Visible Body Atlas is incredible! Amazing and innovative technology! ”
