

# Town Hall Solutions

Townhalls and communal areas can be the centerpiece of any corporate headquarters. AV systems are key to ensure all hand meetings go off without a hitch and get the message across. All-hands meetings are a breeze with a Crunchy Tech town hall.

STUNNING VIDEO

INTUITIVE AUDIO

EMPLOYEE OASIS

Video is a cornerstone of any town hall space. A stunning video system can be used as a platform to bring your events together with other office locations and remote workers. It is also used so everyone in all-hand meetings can see who is talking and remain engaged.

Poor acoustics in any space will always be a factor in how well presentations can be heard. Having the entire company together for a new company initiative is very important, and having proper audio is also equally important.

Create a space that is robust enough to handle large meetings for the CEO and be a haven full of technology for your employees to cultivate thought and collaboration in. Any Crunchy Tech town hall can be turned into an employee oasis for all.
